RBI's Serviceability Makes it the preferred Choice

The **RBI 8800 & 8900 Series** of copper finned domestic hot water heaters & boilers have been operating reliably and efficiently since their introduction in 1988. In addition to their consistent performance, they have come to be appreciated for their ease of serviceability. The unique design allows key components to slide out for easy access resulting in minimal interruption to service. The **8800 & 8900 Series** have come to be recognized as an industry standards. Having stood the test of time, they will continue to perform for years of worry-free service.

RELIABILITY

- Up to 83% Energy Efficient
- Stainless Steel Burners
- Integral Draft Diverter with Single Flue Opening
- 21 Models ranging from 420-4000 MBTUH
- Bronze Headers for Water Heaters & all Boilers 2000 MBTUH and over
- Cast Iron Headers for Hydronic Heating Boilers less than 2000 MBTUH
- Integrated Finned Copper Tube Heat Exchanger
- Various Firing Modes: On/Off, Two-Stage or Motorized Modulation

SERVICEABILITY

- Slide Out Heat Exchanger
- Slide Out Burner Assembly
- 2-1/2" Interlocking Castible Refractory for added strength and higher insulation value
- All Major Components can be inspected or removed without disturbing boiler casing or breeching.

RBI also manufactures the Galaxy Pool Heater up to 400 MBH input, and the Futera & Futera II sealed combustion units with capacities up to 1.9 million input.

Contact BJM for more information on any of these units!
